

HUISMAN TO UPGRADE HEEREMA AEGIR'S OFFSHORE MAST CRANE

Schiedam, the Netherlands, 24 November 2023

Huisman announces that it has been awarded a contract for the upgrade of the Offshore Mast Crane onboard the Aegir, owned by Heerema. This significant project will enhance the second main hoist capacity from 2,000mt to an impressive 3,200mt at a height of 110 meters, making the upgrade highly suitable for the installation of large jacket foundations.

The upgraded crane for one of the world's largest monohull crane vessels will feature a fixed jib section and a robust 3,200mt lower block and hook, providing Heerema with the advanced lifting capabilities required to excel in their upcoming projects.

The Aegir vessel, originally equipped with a 4,000mt Offshore Mast Crane by Huisman in 2013, has been a testament to the enduring quality and adaptability of Huisman's technical solutions. In 2020, Huisman successfully upgraded the lifting capacity of the main hoist to 5,000mt.

David Roodenburg, CEO of Huisman says: "We are honoured to once again collaborate with Heerema on this milestone upgrade for the Aegir vessel. This project reaffirms our commitment to delivering cutting-edge solutions to our clients, making their operations more efficient, and strengthening them in their current and future business."

ABOUT HUISMAN

Huisman is a worldwide supplier of step changing technical solutions to the world's leading companies in renewable energy, oil and gas, civil, naval and entertainment markets. Projects vary from stand-alone components to highly engineered integrated systems, from concept to installation and life time support. Huisman operations are divided between offices in The Netherlands, Brazil, China, Czech Republic, Norway, Singapore and the USA and facilities in The Netherlands, Brazil, Czech Republic and China.
