

## HUISMAN INTRODUCES PERFORMANCE INSIGHTS: A DATA DRIVEN SOLUTION FOR MAXIMISED PREDICTABILITY

Schiedam, the Netherlands, 20 February 2025

Huisman announces the launch of its latest innovation in data driven solutions, Performance Insights. This cutting-edge application empowers Huisman equipment owners to optimise operations, enhance efficiency, and ensure the longevity of their equipment through comprehensive usage monitoring, advanced system analytics and condition monitoring.

The Performance Insights application, accessible via the client portal myHuisman®, analyses equipment data to provide actionable insights across key areas such as equipment performance, alarms and warnings, energy consumption, and component usage. These insights enable clients to make justified, data-driven decisions to maximise operational uptime, improve maintenance scheduling, and streamline project efficiency.

### [Enhanced maintenance based on equipment use](#)

The introduction of Performance Insights marks the beginning of new era in equipment monitoring. It is developed for clients focused on project analysis and

optimising maintenance strategies based on the actual use of the equipment.

The platform supports:

- Improved maintenance scheduling and cycle times
- Proactive fault resolution to minimise operation interruptions
- Reduced operational costs and extended component lifespan

In the near future, Huisman will expand the features of Performance Insights with more valuable technical insights through condition monitoring and system analytics.

**David Roodenburg, CEO of Huisman:** “Our commitment to continuous innovation ensures that Huisman stays ahead in delivering technologies that not only focus on the safety and efficiency of our equipment but also optimise its performance throughout its entire lifecycle. Performance Insights exemplifies this commitment, providing a digital platform that empowers our clients with the data needed to drive efficiency and sustainability in their operations.”

#### **About myHuisman©**

myHuisman© is a comprehensive digital portal designed to provide equipment owners easy access to data and services related to their Huisman equipment. It streamlines the management of equipment performance, maintenance activities, and technical documentation, ensuring clients can maximise the value and efficiency of their assets.
