

## HUISMAN WINS REPEAT ORDER FOR TWO MORE KNUCKLE BOOM CRANES FOR SEA1 OFFSHORE

Schiedam, the Netherlands, 6 May 2025

**Huisman has secured another contract for the delivery of two 250mt Knuckle Boom Cranes, which will be installed on the new ST-245-designed offshore energy support vessels of SEA1 Offshore. The contract was signed with COSCO Shipping Co., Ltd., and follows a previous order for two identical cranes awarded at the end of 2024.**

The cranes will feature Huisman's proprietary Active Heave Compensation system. This system connects the crane's electric setup to the vessel's DC grid, enabling efficient interaction with the vessel's electrical energy storage system. This integration significantly reduces the net energy consumption of offshore lifting operations.

**Cees van Veluw, Product Director Cranes at Huisman, says:** "We are proud to work alongside SEA1 Offshore, COSCO Shipping and Skipsteknisk, combining our expertise to deliver reliable, energy-efficient lifting solutions. The trust placed in us for a repeat order confirms the strength of these partnerships and our shared commitment to innovation in the offshore energy sector."

### Key features of the Huisman Knuckle Boom Crane

- Active Heave Compensated deepwater Main hoist and Auxiliary hoist
- 250mt maximum lifting capacity
- Huisman proprietary Active Heave Compensation system
- 36 meters maximum reach
- Energy regeneration to the vessel grid

---

### ABOUT HUISMAN

Huisman is a worldwide supplier of step changing technical solutions to the world's leading companies in renewable energy, oil and gas, civil, naval and entertainment markets. Projects vary from stand-alone components to highly engineered integrated systems, from concept to installation and life time support. Huisman operations are divided between offices in The Netherlands, Brazil, China, Czech Republic, Norway, Singapore and the USA and facilities in The Netherlands, Brazil, Czech Republic and China.
